

Cork Underlay with Film for Wood Flooring

“Raybone” is a large-scale Cork products manufacturer and supplier in China. We have produced and exported Cork underlay with film for wood flooring for about 20years. “Raybone” Cork underlay with film for wood flooring is made from authentic cork: crafted from 100% real cork. Welcome to act as our agent/distributor in your market.

Product Description

Generally, “Raybone” Cork underlay with film for wood flooring is used under any type of surface, from floating floors (commonly known as panels), hardwood floors and wooden boards, carpeting, linoleum, PVC, to floor cork, natural stone and ceramic tiles. “Raybone” Cork underlay with film for wood flooring has low conductivity of heat and noise. It is always warm to touch, does not permeate nor absorbs our body heat. Contrary to other materials cork keeps its insulation properties in a wide range of temperatures.
